

Maintaining your airplane: Required Maintenance, Preventive Maintenance & Owner Assisted Annuals.

This seminar will focus on keeping your airplane in an airworthy condition. The required maintenance that is needed to keep it safe and airworthy. The preventive maintenance things you can legally do as an owner-operator and how to assist with your annual inspections. Certified Airframe & Powerplant Mechanic Gary Walker will guide you through the steps necessary to keep your airplane safe and in an airworthy condition with an in-depth walk-around using a Cessna 172 as an aid. Certified Flight Instructor Irwin Fust will also update those in attendance on the FAA Wings Program and how it applies to your required 24 month Flight Review.

Directions: Driving: One block south of Red Bluff Airport Terminal. Park in parking lot off street. Flying in: After landing, taxi to south east hangars. Airplane parking available.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
